

Entranceways & Porticos Quality Checklist

Good Guys Contracting strict building standards will ensure your work will be built with Quality and Value that will surpass all others. The following details are just a few of the important details on our Quality Checklist that make a portico built by our “in-house” team stand apart from the rest.

Custom CAD Drawings

We give you an exact visual of what your finished product will look like before we start the project so any changes can be made before we start

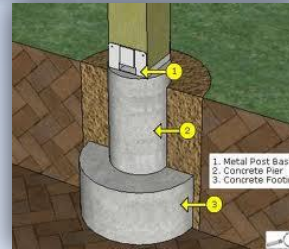

Structural Columns

Strong and solid built to last. We have a large assortment of options from standard to full custom.

Proper Footings

Weather new or retrofitting existing we make sure there are proper footings so your portico never separates from the wall after time.

Maintenance-Free Products

We only use top quality composite or fiber-cement products to achieve a look that is crisp, clean, and requires little to no maintenance.

Integrated Electrical

Weather it's an overhead light or wall sconces we take no shortcuts when lighting your front entrance.

Entry Doors

We can install a new entry door and or storm door to add that final touch for a true custom entranceway.
